

# About Us

## Top National Provider of Transformational Sales & Marketing Technology

W-Systems provides solutions around CRM including Marketing Enablement, Interaction Management, Document Automation, Process Visualization, and Cloud Computing. We are business analysts and developers, and we want to make your sales and marketing technology fit your organization like a glove. Put us to the test, we love a challenge.

W-Systems is a division of UpCurve Inc., and provides process design, application customization, data and application integration, technical installation, training, and both on-site and telephone hotline support.

W-Systems represents and implements Sugar, the premiere commercial open source CRM application. We are designated by [SugarCRM](#) as an Elite Partner and are among their top five of hundreds of implementation partners worldwide.

W-Systems is the developer of many Sugar Modules and Integrations including [wMaps](#) (Sugar Integration to Bing Maps), [wDocs](#) (Sugar Document Automation), and the [Sugar Connector to DocuSign](#).

Our experience in implementing sales and marketing technology for a range of organizations has taught us many lessons about the practical use of technology in most revenue models and industries. Our notable expertise in CRM deployments for financial services, professional services, technology, manufacturing, medical devices and higher education organizations.
